THE SYDNEY MORNING HERALD, TUESDAY, APRIL 22, 1862

The Committee of the Temperance Alliance held their usual annual picnic at Middle Harbour yesterday. The steamer "Waverley" left the Circular Quay shortly before ten o'clock, filled with the members of the society, and their friends, and proceeded to the open spot on the north-western side opposite the sand spit. Varied were the amusements and pastimes—there was a plentiful supply of that most

The members of the St. Mary and St. Joseph's confraternities, who were on their excursion to the Middle Harbour, were most successful in their search for the "treasure" which had been hidden there. The confraternities were most successful in their search for the "treasure" which had been hidden there. The confraternities were most successful in their search for the "treasure" which had been hidden there.

ports had been provided, amongst which jumping, throwing the hammer, archery, cricket, and football were entered into the general sports. A number of the Roman Catholic clergy were present, including the Rev. John J. Gault, Mr. J. J. Sheehy, V.G., Dean Sumner, the Revs. Messrs. James Quirk, Walsh, Athy, and Fitzpatrick; also, Mr. James Hart, M.A., and many leading citizens of Sydney. Upon the arrival of the steamer each party set about finding a place for themselves, and the spot whereon to spread the cover; this done the sports were commenced—the best jumper being Mr. Garvan, the cricket being Mr. Brady, and Mr. Donnelly securing a prize by throwing the hammer forty-seven feet. The prize money were won by Miss M. Sullivan and Mr. Strickland.

the gentlemen a very handsome party. Although the chair and the rig was not very good, it created a considerable amount of enthusiasm. At one end of the sword a bowler had been erected, within which a table was placed for the use of the spectators. The table was set down with keen appetites, if we may judge by the amount justifying the name of the place, and thereon in profusion. The chair was occupied by the chaplain of the Guild. The arrangements for the conveyance of passengers, and the general conduct of the various matches, were under the guidance of Mr. James Parker, assisted by members of the Guild, and to them and to Mr. Sheridan great credit is due for the admirable issue of the entire programme. No accidents occurred to mar the

parasite of the great number of joyous people of both sexes and all ages who thronged the beautiful spot selected for the picnic, rendered still more beautiful by the groups scattered upon the grassy flat, or beneath the shade of the trees, with the votaries of Terpsichore devoting themselves unceasingly to polka and quadrille, and the more robust "tripping it" to the hit of an Irish piper. The whole of the vast concourse were landed again in Sydney by seven p.m.

cursion took place in connection with the St. Bonadif's Young Men's Society. The commodious steamer the Colaroy, under the command of Captain Mulhall, had been chartered for the occasion, and left the Australasian Steam Navigation Company's Wharf, Sussex-street North, with

about 260 persons on board, at ten o'clock a.m. Part of the band of H. M. S. 12th Regiment were in attendance, their cheerful and untiring efforts contributing not a little towards making the day pass harmoniously and agreeably.

Working along through the overhanging sandy cliffs, the water was very shallow, the coral, the Calappa lary at length rounded the Hecla, and the vessel took a northerly course, rushed past that enormous barrier presented by the weather-worn cliffs which face the ocean between the Great North Head and the seaward aspect of Manly Beach. Following on the interesting coast line of Curl Curl, Devine, Long Reef, and Narrabeen, etc.,—the vessel was now in the open sea, and the rough seas were terrific, swells and breakers, and the vessel was tossed about.

pleasure-seekers were at length abreast of the singular headland of Barrenjuey, forming the extreme south-eastern limit of the estuary which serves as a common outlet for the River Hawkesbury and the Pitt Water. Shortly after passing the Custom House station the course of the Collaroy then

took a southerly direction, and so brought the holiday folks into the lake-like solitudes of Pitt Water, until wooded hills seemed to be rising on every side of the vessel. The passengers were landed at a small, but commodious wharf, erected on the property of the Venerable J. J. Therry, under whose especial patronage the excursion had been got up. Most of the visitors set off in quest of St. Michael's Cave, determined not to lose the opportunity of seeing so great a

natural curiosity. The wait, it was found, lay through woods, a long flat, and a hilly scrub, until, facing to the east at the head of the inlet, the merry party, in a straggling Indian file, at length arrived in the vicinity of the cave; cautiously descending the rocks, and creeping carefully along a narrow path specially made for their convenience on the face of the cliffs, they were thus finally rewarded for their perseverance. Almost everybody managed to scramble up into the cave, and not a few of the more adventurous explored its inmost recesses by candle-light. The effect of the gloomy inner arch looked

down upon from the top of the second angle of the cave, was much admired; and so also was the wider arch at the entrance, as contemplated from the spot where the bright daylight again began to stream down upon the faces of the returning explorers. There was, for some time, a pleasant buzz of conversation and a discussion of food at the mouth of St. Michael's Cave, and then the party set out on their way back to the steamer, where dinner had been prepared.

Some with sharpened appetites posted thither at once, but many remained with the band near the house on the flat, and amused themselves with dancing, playing cricket, and so on. There was some dancing also at the steamer after dinner was over. The Kambia steamer visited the wharf at an early hour, landed some passengers, and afterwards returned for them. The Collaroy left the wharf for Sydney at about five

o'clock, and arrived safe at Sydney soon after eight. The Right Worshipful the Mayor of Sydney, the Mayors, and other members of the family were on board. We also observed the Rev. Fathers Corish, Curtis, Hanson, and Powell, besides the Venerable J. J. Therry. The trip appeared to give general satisfaction, although a slight shower, soon after the arrival of the Collaroy at Pitt Water, interfered with some of the arrangements.

CRICKET.

ONE of the events of yesterday, which attracted a large number of spectators, and enlisted much interest, was the cricket match, in the Domain, between the Albion and Albert Clubs. It was a splendid day for cricket, and the ground, encircled by people who evinced an almost enthu-

siatic concern in the play, bore a cheerful and animated aspect. Although, as might have been anticipated, the opposing clubs proved to be of very unequally balanced strength, there was some excellent cricket on both sides, and evidences of a general improvement. The bowling of Laurence was very fine, and most damaging to the Albions in their first innings. Nevertheless Harper, G. Unwin, and private Hardy, by some good batting scored

double figures. The weak point of the Albions was in bowling, Kellick and Aylward alone being able to play on the stumps; and even against their bowling the Alberts made heavy scores. The batting on each side was much more lively than it has been in prior seasons, and seems to indicate the approach of a brighter era in our intercolonial contests. It cannot, however, be expected that the fine

lessons our players have been recently taught will, even if the instruction be favourably taken and acted upon, be productive of great results in a brief period; indeed it is somewhat surprising to see the improvement made up to the present, considering how many defects had to be rectified, and how many almost radical changes to be made in style and mode of action. The following was the score:—

FIRST INNINGS.		SECOND INNINGS.	
G. Urwin, b. Laurence	10	b. Laurence	10
J. Kellick, b. Laurence	2	c. Greville, b. Curtis	0

The Alberts won 111 in excess in one innings.

A match came off on Saturday last between the Imperial Cricket Club and the Pyrmont Cricket Club, which resulted in favour of the latter with two runs to spare.

RIFLE MATCH.
Amongst the number of amusements which took place yesterday, was a series of rifle matches, at Cook's River, for sweepstakes of different amounts, which were won by Messrs. T. Hellyer, W. Gannon, and Shannon. A match at 600 and 600 yards (three shots at each range) also came off, for a silver cigarette box, valued at £2 10s., which after three

ties, resulted in favour of Mr. Shannon, of the Newtown company, he scoring eleven points in ten shots, and Mr. T. Hellyer scoring ten.

TELEGRAPHIC SUMMARY

FOR ENGLAND.

OF NEWS FROM MARCH 22ND, TO APRIL 22ND. The Bombay, with the English mails of December, arrived in Sydney on the 25th of March, having been obliged to put in to the Mauritius owing to an accident in her machinery.

The Madras, with the English mails of February, arrived on the 26th instant.

Parliament is to assemble for the despatch of business on the 27th of May.

Sir John Young returned to Sydney on the 14th instant, from a visit to Norfolk Island. His Excellency was favourably impressed with the morality and the social condition of the people, and directed that all Sir William Denison's regulations were to remain in force, adding instructions for the better cultivation of the land. The population of Norfolk Island is 268, the number having increased by 71 since their settlement five years ago.

The Government have bought two hundred acres of land at Honehouse for a public cemetery.

Colonel Barker, R.E., late Surveyor-General, died on the 16th instant.

The revenue returns for the first quarter of 1862 show an increase of 29 per cent. upon the corresponding quarter of 1861.

There is a steady increase in the yield of gold. The new diggings at the Lachlan are very productive, and are attracting numbers of miners from Victoria.

An association has been formed in Sydney for the cultivation of cotton. The Ministry have promised to propose in Parliament a grant of £6000 acres and a vote of £2000 to further the object. It is proposed to subdivide the land in farms of six acres each.

Sydney, one of the hotbeds of the riots at Barrington, has been found guilty and sentenced to two years' imprisonment.

The Customs revenue for March amounted to £55, 9.

The receipts of gold by the Bankers during March were £7,311 10s.

The arrivals from England have been—Cambridge, Dunstable, Cal. Prince of Wales, Daisy, Annie Wilson, Oughdale, Morphet.

The following vessels have sailed for London—Granite City, Peter Godfrey, Agre, and John Banks.

Exchange on London, at sixty days' sight—Buying rate, par, selling rate, 11 per cent. premium.

THE PRODUCTION OF WOOL IN NEW SOUTH WALES.

To the Editor of the Herald.

SIR.—Several articles have been lately published in the Sydney Morning Herald on sheep farming and wool growing. I will not enter into any discussion upon the management of stations, because I do not understand it. I will only consider the question in reference to the quality of the wool, and I dare say that my opinion will be corroborated by some of the Sydney wool-buyers.

I have known the Australian wool since 1845, and have employed it as a manufacturer. I came to the colony ten years ago as a wool-buyer, and am now on the eve of quitting it, and being out of business, I trust my observations will be looked upon as being disinterested.

In my opinion, the Australian wool, with very few exceptions, has been receding every year since the gold discovery, and continues to do so, although a few settlers have kept up the breed of their flocks. The X.R. in diamond has been sold within the last two years in the colony, at 11s. and 12s. a pound, and the quality of the wool has been deteriorated by the enormous price paid for the wool within the last six years, have thought that they would be benefited by introducing heavy rain in their flocks, but the difference of price has been compensated for by the weight.

The type of the Australian sheep is essentially German. It only kept up by the introduction of German rams and ewes. I would not say that the quality of the wool has been deteriorated by the introduction of heavy rain in their flocks, but the difference of price has been compensated for by the weight.

The Australian wool has the advantage of being sorted, and the French wool is much finer and coarser in the hair, and the French wool is much finer and coarser in the hair, and the French wool is much finer and coarser in the hair.

COLONIAL EMANCIPATION.

To the Editor of the Daily News.

SIR.—On the narrow escape we have had of a war in defence of Canada to lead the nation to think seriously not only of the reduction of colonial expenditure, but of colonial emancipation? England has long been promised herself the honour of becoming the mother of free nations. It is not time that this promise should be fulfilled.

If there had been a war with the United States, the Trent would have been the occasion, but Canada would have been the cause. It is because we have a dependency on that continent, easily accessible, and which, because it is a dependency, it is thought not honourable to smother the idea of a quarrel with England, rises in the minds of the Americans whenever their temper or the desire of relief from internal difficulties leads them to think of a foreign war.

It was generally assumed that the war would have been short and easy. In defence of England all would be short and easy; but the best judges come to think that a war would be by no means short or easy if waged in defence of Canada against a power with an immense population close at hand, and able to put an overwhelming force upon the Lakes.

There is but one way to make Canada impregnable, and that is to make it a free nation, and to give it an independent constitution. To invade and conquer an independent nation, without provocation, is an act from which, in the present state of opinion among the nations of the world, no nation would recede. The manifest unwillingness of the Americans to be annexed was a greater source of strength to the late coalition than arms or fleets.

There is but one way to make Canada impregnable, and that is to make it a free nation, and to give it an independent constitution. To invade and conquer an independent nation, without provocation, is an act from which, in the present state of opinion among the nations of the world, no nation would recede.

them, in their brief tenure of power, to break; they are tempted, not by the love of pleasure, but by the love of power, and by the love of the strong claims of political friends who stand ready for each colonial government as it falls vacant. Most of them are also tempted, as the advocates of our own empire, with a certain connection, to ratify democracy in the colonies, while they find themselves unable to construct any other kind of constitution.

It is not to be expected that an inch of the Empire will be given up by the present Premier. Though youthful in body, vigorous in mind, and untroubled by the great moral and mental claims which have taken place in Europe since he first entered public life. But he will be succeeded, probably, by statesmen more imbued with the ideas of the advocates of our own empire, and more dependent upon it, such statesmen will be disposed to retreat our Empire, in order to add to our security and greatness.

I am, &c.
Oxford, January 27, 1862.
(From the Times, February 4.)

Experience has taught us that there are certain fallacies which repeat at intervals like comets of short period, and which, in the present state of opinion among the nations of the world, no nation would recede.

members of the Church of England in the colonies is denounced as "overthrowing the rights of the people." The English Anglicanism, by the creation of historical anomalies in this country, and in the hope of permanently forming the spiritual life of a new nation. The attachment of French Canadians to the English Government is a thing required—"Our presence in Canada actually preserves the French Canadian element, an indispensable relic of old times, and the only source of free thought, and of the value for the purposes of modern civilization."

But if the greater colonies are to be abandoned to their own devices, and to save them from the consequences of their own actions, and to save them from the consequences of their own actions, and to save them from the consequences of their own actions.

But if the greater colonies are to be abandoned to their own devices, and to save them from the consequences of their own actions, and to save them from the consequences of their own actions, and to save them from the consequences of their own actions.
